Less is more: TOP-LINE
The new connecting system
from Doellken.

Doellken TOP-LINE:
**The unobtrusive connecting system
with obvious practical benefits.**

Doellken TOP-LINE:

Just right for a number of ingenious applications.

With the new, innovative TOP-LINE connecting system from Doellken, kitchens soon get a perfect finishing touch: Wherever a gap needs to be sealed or covered, this practical connecting system can be fitted with minimum time and effort to create a perfect visual effect.

- Blends in with its surroundings, because it is unobtrusive to the eye and therefore the ideal complement to all style ranges
- Can be used as a worktop, wall and carcass connection
- A problem free solution for horizontal, and now also vertical application, with one and the same system

Doellken TOP-LINE:

Reduced colour range for maximum co-ordination.

The 4 chosen colours fit in smoothly and unobtrusively with all the styles and fittings of modern kitchen design ranges:

- The finishes are co-ordinated with the look of built-in appliances, extractor hoods, accessories etc.
- By reducing the number of finishes, stockholding is reduced and purchase-quantities are optimised
- Suits all trends in all aspects of kitchen design

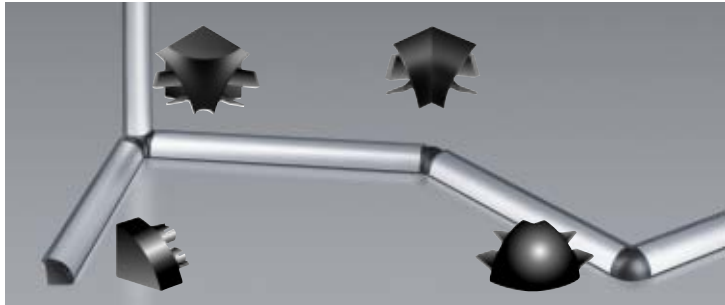

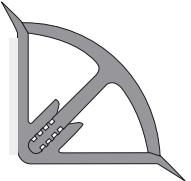

Doellken TOP-LINE:

Efficient assembly for best results.

With little time and effort, the TOP-LINE connecting system from Doellken can be quickly and easily laid to fit snugly on a huge variety of surfaces – assuring a neat and clean finish throughout the whole kitchen area.

- Stick the base profile to the wall with its self adhesive tape and just snap in the cover section
- Perfect adhesion to tiles, granite, laminates, wallpaper, mineral-based surfaces, wood etc.
- No additional drilling, screws or silicon sealant needed

Doellken TOP-LINE:

Ingenious accessories for all possible applications.

With a small number of accessories, TOP-LINE connecting systems set new standards in user-friendliness and versatility. As a result you have a simple but elegant practical solution – whether used horizontally or vertically.

- Endcap (for right and left handed use)
- External corner
- 90° Internal corner
- 135° Internal corner
